01/01/09	ART	Mark your calendars: January 2009 is LA Arts Month. Through community outreach, ticket giveaways, and a viral word-of-mouth, print, and radio campaign, the arts community is urging Angelenos to enjoy the best the art world has to offer without leaving LA. Whether visiting a local gallery or museum, catching a show at a small theater, or getting a taste of a multi-cultural festival, the point is to seek out new cultural experiences.	Olga Garay, Diane Rodriguez	
01/01/09	ART	Charles Phoenix - pop-culture expert with a passion for mid-century American culture, impresario of slide shows, and tour guide - is adding another feather to his cap. He will stand on the tail-gate of a red 1964 Ford station wagon venture as Grand Marshall of the 2009 Doo Dah Parade, the irreverent twisted sister alternative to the more civilized Rose Parade. Stepping out at 11:30 on Sunday, January 18, "paraders" strut their stuff while parade-goers line up for the fun.	Charles Phoenix, Tom Coston	
01/01/09	LIT	In her latest book, "The Widow Clicquot," author Tilar Mazzeo tells the intriguing story of a young French widow who became one of the richest women of her lifetime. She was the world's first great businesswomen, taking over her late husband's wine business in the wake of the Napoleonic wars. Still a legend in France, Barbe-Nicole Clicquot Ponsardin built the Veuve Clicquot champagne empire at a time when women simply didn't control their financial fates. Patt talks with Mazzeo about this captivating historical figure and the legacy she's left behind.	Tilar Mazzeo	
01/01/09	HIST	Shaped by Vietnam, racial unrest, and the power of television, the 1968 presidential election was a watershed in American politics. Democratic candidates Eugene McCarthy and Robert Kennedy inspired young voters, but their heated contest ended in unexpected violence. In its wake, Richard Nixon was elected president, signaling a new era of Republican conservatism. We look back on the dramatic events of Campaign '68 with a special documentary produced by American RadioWorks.	APM special	00:52

01/02/09	HEAL	U.S. and key world allies are pushing hard for a cease-fire in Gaza, but currently there is no end in sight to the violence. Yesterday, Israeli air strikes killed a senior Hamas leader. Meanwhile, the United Nations estimates that at least a quarter of the 400 Palestinians killed in the Gaza Strip are civilians. Guest host David Lazarus gets the latest news from Ashraf Khalil, Jerusalem Correspondent, Los Angeles Times, and an update on humanitarian efforts from Christopher Gunness, Spokesman, United Nations Relief and Works Agency for Palestine Refugees.	Ashraf Khalil, Christopher Gunness	20:00
01/02/09	ENT	LA Times writer Richard Verrier joins guest host David Lazarus to talk about how the entertainment industry is adapting to the worst economic slump in decades.	Richard Verrier	20:00
01/02/09	SAC	On January 1, dozens of new state laws took effect, including bans on text-messaging while driving, electronic bingo machines and bidding on state contracts by companies that do business with the government of Sudan, which the U.S. has accused of genocide. David talks with ..... about the new state laws and how they will affect the way people live and do business in California.	Dan Walters	20:00
01/02/09	TRAN	David Lazarus talks with Officer Rick Quintero about how the California Highway Patrol will enforce the new ban on text messaging while driving. Then he'll takes calls from listeners about the craziest thing you have seen people do while driving. Will all these new laws targeting phone use while driving actually reduce accidents?	Officer Rick Quintero, Steve Hymon	30:00

01/02/09	ECON	Apparently, the world has just stopped ordering and making stuff. A report issued today by the Institute for Supply Management shows that manufacturing activity is down to its lowest level in 28 years. And activity has contracted for 13 consecutive months. Not a good way to start the New Year. That said, the Dow closed up today, kicking off 2009 on an up note. We detail today's report and take stock of the year on the market. 01/02/09	ART	TV is changing so fast it's hard to keep track. The major networks, both broadcast and cable, continue working hard to capture the vibe of the next Sopranos, or Seinfeld, with mixed success. NBC is moving Jay Leno to prime time....what impact will that have on expensive sitcoms and hour-long dramas? Meanwhile, new distribution methods such as YouTube and Hulu are changing the very way people watch TV. Conventional cable and airwave broadcasts are almost quaint now, with computer streaming rapidly replacing them. What can we expect to see moving forwards on our televisions and laptops? And how will that influence content, when anybody can distribute a show to everybody via the Internet?	Cynthis Littleton, Virginia Heffernan	
01/02/09	POLI	In a whirlwind of activity in the nation's capital next week, President-elect Barak Obama arrives to claim the oval office, Roland Burris arrives to try to claim his new Senate seat, and the lame duck Congress - well, what will it do? A sneak peak into next week in Washington.	Ron Elving	
01/02/09	TECH	January 3 <sup>rd</sup> marks the five-year anniversary of Spirit's arrival on the red planet; Opportunity knocked at Mars' door a few weeks later. The rovers were only expected to operate for about three months, but both have continued to function, even through frigid cold and dust storms. Their explorations have gleaned, among other things, evidence that liquid water once existed on Mars. JPL has further plans for the rovers in 2009; we'll find out where they're headed from Project Manager John Callas.	John Callas	
01/02/09	ART	Catherine Blyth says, "Conversation is the most fun you can have for free, without catching a disease." And fun she has with her delightful tips on listening, talking shop and even surviving conversational bores, all contained in her new book, "The Art of Conversation." In one ploy to redirect a bullying brother-in-law, she recommends interrupting him with flattery - ""I so agree. That's why I do X..." Seek advice, offer praise. If the ranting continues, smile and, as China's hallowed Thirty-Six Stratagems advises: "Relax while the enemy exhausts himself." Blyth shares her conversation arsenal and tells us how we can best "deal with bores, chores, and other conversational beasts."	Catherine Blyth

01/05/09	ECON	President-elect Barack Obama arrived on Capitol Hill late this morning for talks with House Speaker Nancy Pelosi on his proposal for a tax cut of up to \$300 billion. Besides \$500 tax cuts for most workers and \$1,000 for couples, the Obama plan includes more than \$100 billion for businesses, an Obama transition official said. The total value of the tax cuts would be considerably greater than had been indicated earlier.	John Irons, Jack Shaw	30:00

01/05/09	POLI	As the Palestinian death toll tops 500 and Israeli ground forces move to cut the Gaza Strip in half, Israel's overwhelming show of force against Hamas continues unabated, even as international pressure for a cease fire increases. Diplomatic negotiations between the Israelis, Palestinians, and various Arab players in the long-running Gaza dispute intensified today, with even Israel's most reliable ally the United State calling for the cessation of hostilities. What are the domestic views among both Palestinians in Gaza and Israelis that will determine how this latest chapter in the sad conflict concludes?	Safwat al-Kahlout, Shmuel Bar	00:26
01/05/09	POLI	The Minnesota Canvassing Board meets today to certify the election of Al Franken to the U.S. Senate after the state Supreme Court refused Republican Norm Coleman's request to count 650 rejected absentee ballots in a recount. Franken now leads with 225 votes, but there remains a seven day window for a court challenge to the MCB's pending certification and Republicans say they'll filibuster if Franken tries to take the seat in D.C.	Michael Mulcahy	00:09
01/05/09	SCI	Scientists have long blamed climate change for a mass extinction about 12,900 years ago. Something dramatic happened that wiped out a culture of Paleo-Americans known as the Clovis people and most of the largest animals in North America, including horses, mammoths and giant armadillos. A more recent, controversial scientific hypothesis suggests that a comet was to blame—a comet that broke into fragments, turning the sky ablaze. New evidence for the theory? Nanodiamonds. An author of the paper, which appears in the current issue of Science magazine, explains.	James Kennett	00:14
01/05/09	LAW	The state's high court ruled today that three Southern California parishes that left the U.S. Episcopal Church over its ordination of gay ministers may not retain ownership of their church buildings and property. 01/05/09	POLI	9-11. Iraq. Guantanamo and Abu Ghraib. Katrina. Eight years ago, President Bush was sworn into office with a \$237 billion budget surplus and relative economic prosperity. He now presides over a \$438 billion deficit, two wars, and a severe economic downturn. According to a Pew survey released this month, only 11 percent of Americans rate Bush as an "above-average president," compared with 44% for Clinton. How did the Bush Administration come to this place? How will the history books view the Administration? As part of a series looking back at the Presidency—and looking forward to the next one—Patt checks in with political consultants who worked with President Bush and reviews the turning points and tribulations of America's 43rd president. 01/06/09	RELI	Monday, the California Supreme Court ruled that three Southern California parishes that left the U.S. Episcopal Church over its ordination of gay ministers cannot retain ownership of their church buildings and property. St. James Church in Newport Beach, All Saints Church in Long Beach and St. David's Church in North Hollywood pulled out of the 2.1 million-member national Episcopal Church in 2004 and sought to retain property ownership, but in a unanimous ruling the state's high court found that the property belongs to the Episcopal Church because the parishes agreed to abide by the mother church's rules, which include specific language about property ownership. In a time of recession, brought on in part by the financial overextension of banks, investment firms and Americans themselves (fueled by artificially high housing prices), curtailing spending and padding the savings account should be seen as a smart step. For the year the economy lost 2.6 million jobs, the most since 1945. In a sign that the recession was just getting underway at the end of 2008 and should drag on well into the new year, nearly 2 million of those losses came in the last four months alone. 01/09/09	ECON	Los Angeles-area rents are finally following national suit and declining, but that might not be good news in the long-run. It's the result of a complex set of factors, including home foreclosures and an increased supply of rental units due to overbuilding from the real estate boom-both of which are adding to the supply and demand of the rental market as foreclosed homes become rentals and former home-owners seek places to rent. Southern Californians may be snatching up sweetened deals today-including significant rent reductions and rent-free first months-but those lower rents are in turn lowering the incentive for renters to buy a home, adding yet another obstacle to a housing market recovery. 01/12/09	POLI	Hillary Clinton is spending today cramming for tomorrow's confirmation hearing, hoping to downplay old disagreements with President-elect Obama. While the Foreign Relations Committee expects to confirm her as secretary of state in a relatively speedy one-day hearing, her husband—as in several key moments in her campaign for the presidency—could raise controversy for her appointment. Questions remain about several of his overseas business and charity enterprises. While confident of her confirmation, the committee's staff has taken the precaution of reserving the committee room for a second day, just in case. Could Bill's ventures present a real roadblock?	Glenn Thrush	00:15
01/12/09	ECON	When news reports first surfaced last week that President Bush might ask Congress to release the second half of funding from the Troubled Asset Relief Program it seemed to be a last minute attempt to exercise authority by an outgoing administration. Turns out that President Bush was acting at the behest of incoming President-elect Obama, and in fact this morning Bush officially notified Congress that he would like to use that last chunk of TARP money, totaling \$350 billion in all. This allows the money to be queued up and ready to go when Obama takes office next week, and avoids potential fights with a skeptical Congress. How will a President Obama manage the money the second time around?	Silla Brush, Vincent Reinhart	00:20
01/12/09	ENV	Back in early summer of '08 weather forecasters were cautiously optimistic that the cool Pacific water trend known as La Niña, which forces the Jet Stream and all of its accompanying wet storms north out of Southern California, was fading out. Are we in for a repeat dry winter this year?	Josh Willis	00:10
01/12/09	SPOR	Sports fan (and President-elect) Barack Obama hasn't been shy about advocating a playoff system for college football. Currently mired in the bowl-driven and often confusing Bowl Championship Series (BCS), college football just ended another contested year with Florida claiming the top ranking, but many other college teams feeling they are also deserving. On two more occasions last week the President-elect voiced his support for a playoff system: will some presidential muscle finally see the playoff idea into the end zone?	Petros Papadakis	00:08

01/13/09	POLI	Bush ran in 2000 as a "uniter" willing to work across the political spectrum. Ultimately, things didn't exactly work out that way, to say the least. But his administration's policies also formed a split within the Republican Party. Neo-Conservatives, who support an aggressive, pre-emptive foreign policy, supported Bush's policies--if not always how they were administered. More classical Republicans felt Bush was overreaching in foreign entanglements. Moreover, the Libertarian wing of the Republican Party has often been highly critical of Bush for his expansion of government and the consolidation of power in Washington. Larry checks in with a variety of conservatives for their thoughts on the Bush legacy.	Tom Minnery, Matthew Continetti, Jon Fleischman, Mike Tanner	60:00

However, this recession should bring the ranks of unemployed college grads well north of 4% sometime this year, making it the highest rate since 1983. 01/16/09	POLI	9-11. Iraq. Guantanamo and Abu Ghraib. Katrina. Eight years ago, President Bush was sworn into office with a \$237 billion budget surplus and relative economic prosperity. He now presides over a \$438 billion deficit, two wars, and a severe economic downturn. According to a Pew survey released this month, only 11 percent of Americans rate Bush as an "above-average president," compared with 44% for Clinton. How did the Bush Administration get here and how will history remember them? Today we examine Bush's foreign policy legacy with one of the main architects of the President's aggressive approach. 01/16/09	ART	Hollywood's snowbunnies are romping between screenings and parties in Park City, Utah, for the 25th Sundance Film Festival. Independent filmmakers are wishing for snow angels to buy up their flicks in this particularly harsh economic environment. With more than one hundred films on show, everyone is on the hunt for the next big thing. But a dismal year at the movies has toned down the parties, left distributors with little spare change, and driven some industry insiders to skip the festival altogether. Patt talks with LA Weekly's Scott Foundas about the reality facing independent films, the history of the festival, and this weekend's hot tickets.	Scott Foundas	00:11

The action, along with the approval by voters for the sale of up to \$500 million in bonds, was a key step in construction of a football venue in Industry. Ed Roski, the billionaire behind the effort, plans to start construction as soon as a team has committed to playing there. Obama also directed his administration to get moving on new fuel-efficiency guidelines for the auto industry in time to cover 2011 model-year cars. California's proposed restrictions would force automakers to cut greenhouse gas emissions by 30 percent in new cars and light trucks by 2016. In 2007 the Bush administration's Environmental Protection Agency denied California's waiver request, gaining praise from the auto industry but touching off a storm of investigations and lawsuits from Democrats and environmental groups who contended the denial was based on political instead of scientific reasons. The physicians also complained that the number of uninsured and underinsured patients has become untenable due to the closure of 85 hospitals and 55 emergency rooms in the past decade. Under state law, emergency care must be provided to all patients regardless of ability to pay. Doctors have long complained that the state has required them to provide care without providing necessary financial support. 01/28/09	ECON	The stimulus package is on its way through the Congress with Obama's pen waiting to sign it. But some law makers and economists are very critical: they see the plan as a big barrel o' pork. Others say it will raise the deficit so far that it may hurt the economy more than it helps. But with the economy in a tail spin, is any plan better than no plan?	Steve Moore, John Bryson, Carey	00:23
01/28/09	POLI	Speaker Nancy Pelosi last week named Rep. Zoe Lofgren (D-CA) to chair the House ethics committee, officially known as the Committee on Standards of Official Conduct. Patt takes a closer look at what issues, in addition to investigating powerful Ways and Means chairman Charles Rangel, the committee will take on under a new administration in the coming year.	Zoe Lofgren	00:12
01/28/09	ENV	It had been a relatively quiet 15 years in Southern California as far as earthquakes go. There had been a few sporadic seismic events but they've all been minor and very spread out. Then in the past six months there have been numerous small earthquakes, the latest coming last week in the San Fernando Valley. Does the shaking have any "big picture" implications for the likelihood of a large quake occurring in the near future? And then we look at the mother of all fault lines, the San Andreas, which researchers have concluded is long overdue for a big quake. Are there reasons to be concerned? 01/28/09	EDUC	He was the number two, now he's the big cheese—the superintendent of the LA Unified school district. Ramon Cortines is taking over from his departed predecessor, David Brewer—it's a job he's done briefly before, nine years ago, and now it's his. So what are his plans? One of his first moves as Superintendent was to pledge no mid-year teacher layoffs—even though the district authorized the layoffs as it tries to cut hundreds of millions of dollars from its budget. The senate is preparing to take a historic vote on whether to make Blagojevich the first Illinois governor kicked out of office. The Governor decried a "rush to judgment" and spoke about his parents and his decision to buy \$2.6 million of flu vaccine in 2005, among other things.	Ben Calhoun	00:11
01/29/09	HEAL	Post concussion syndrome has made frequent appearances on the list of injured NFL players over the past few seasons—in fact, every sport from hockey to even baseball has seen instances of concussions jump recently. Now research suggests that brain injuries once only seen in boxers are becoming more common among football players. Chronic traumatic encephalopathy, or CTE, has been found in the brains of six former NFL players during post-mortem examinations, the latest case announced this week in former NFL lineman Tom McHale. 02/02/09	ENER	After the major realignment of the political stars this last November, it's hard to believe yet another election is coming. Locally, the March election could have profound effects on the power brokers in Los Angeles. Up for grabs, the City Controller, City Attorney, and Measure B, a plan to enhance the city's solar power generation through rate increases. The Mayoral election is part of the ballot too, although Villaraigosa seems poised, at least so far, for an easy victory. And depending who wins the other positions, it could mean a major consolidation of his power. March 3 is the day. What, exactly, will get decided? And what will it means for Los Angeles. 02/02/09	MILI	After six years and at least \$50 billion in American money, what is there to show for the colossal reconstruction effort of Iraqi infrastructure? American money and energy went to a huge variety of projects, from rehabilitating oil fields to construction of basic utilities like the power grid and water treatment plants, producing a few victories but many more failures in the plan to rebuild Iraq after the 2003 U.S. invasion. A new report from the Special Inspector General for Iraq Reconstruction sums up the hard lessons learned in Iraq and attempts to follow the mysterious trails of billions of dollars that seemingly vanished in the Iraqi desert. 02/04/09	POLI	The money's just running out. State bonds have been downgraded. People aren't getting tax refunds. The pressure is mounting to get a budget resolved. Southern California Republican Party Vice Chairman Jon Fleischman says, fine, that doesn't mean you get to walk away from your core principles. He says if Republican law makers give in on their promise to hold spending, censure them. But is this the kind of hold-the-line philosophy that can survive in an economic crisis that's resulted in a \$40 billion budget hole?	John Kobylt, Patrick Dorinson, Jon Fleischman	00:11
02/04/09	SPOR	Yesterday Manny Ramirez, who almost single-handedly propelled the Dodgers into the second round of the playoffs last season, turned down the Dodgers' latest offer of a \$25 million, one-year contract. Manny's agent, Scott Boras, rejected the Dodgers' offer because he's confident there are other teams who will give his client more money for more years, yet no other offers have been made yet. With only a few weeks before Spring Training begins and the Dodgers seemingly the only team willing to spend big on Manny, is he being a greedy fool or the ultimate sly negotiator? And in other news, a federal judge today unsealed hundreds of pages of court documents at the heart of the government's criminal case against home run king Barry Bonds, including positive drug tests—has recent drug use by players cost baseball its reputation as America's wholesome pastime? 02/16/09	LIT	It's hard to imagine a time when Americans didn't know every detail about the life of their president. But at the time of Lincoln's assassination there was no mass media. Information was not as accessible as it is now. In fact, the image that America knows of Lincoln grew and was shaped after his assassination. It is steeped in mythology that developed over time. In "Looking for Lincoln: the Making of an American Icon" (Alfred A. Knopf) Philip Kunhardt III, his brother Peter and his son Peter Kunhardt Jr. describe the competing versions of his history and describe the legend that grew over time. Larry talks with Philip Kunhardt III about one of America's most famous presidents.	Philip B. Kunhardt III	30:00

They were chronically mistreated and underfed and more of them died in prison than on the battlefield. The author joins Larry to talk about how he uncovered the horrifying evidence about the American loss of life in New York's British prisons	Edwin Burrows	30:00
02/16/09	YOUT	For over thirty years, Bill Strickland has transformed thousands of lives as the founder and CEO of Manchester Bidwell, a Pittsburgh-based jobs training center and community arts program. The innovative nonprofit works with corporations, community leaders, and schools to give disadvantaged youth and adults the opportunities and resources to improve their lives. The Manchester Craftsmen's Guild offers programs in ceramics, photography, and painting to hundreds of kids a year, 90% of whom obtain high school diplomas and pursue higher education. Additionally, the Bidwell Training Center prepares adults for careers in the culinary arts, pharmacology, and horticultural technology. 02/20/09	ECON	Howard Marks is a financier with \$55 billion at his disposal, and President Obama wants him, and other private investors like him, to help shore up the nation's troubled banks by putting money into trouble assets that few others will touch. Investments from the private sector might just counter some of the fear on Wall Street and help to get money moving again. But even Marks, one of the biggest players in "distressed investing," is not sure this is such a good deal. The risks, both political and financial, are huge, and profit-taking by "vulture" investors in this economy could be seen as a negative by stock-holders and the public. So, what are the benefits, what are the risks, and what is the answer?	Howard Marks, Campbell Harvey	00:35

02/20/09	ART	It's a delicious irony of pop-culture—a cartoon TV show that makes its living referencing and lampooning popular culture has itself become a pop icon. Seth MacFarlane created "Family Guy" when he was only 24-years-old and it has since developed into a \$1 billion franchise. Since then Seth has fought numerous creative battles with the Fox Network, created several new cartoon projects and spin-offs of "Family Guy" and even ventured into Broadway musicals and video games. It's a blazing career path that is about as surreal as a talking dog or an evil baby bent on world domination—it's Seth MacFarlane's irreverent world.	Seth MacFarlane	00:18
02/20/09	POLI	It's certainly an interesting time for the State Republican Spring Convention, in the wake of budget negotiations that saw GOP legislators marginalized and a Republican governor working almost exclusively with Democrats. Much like the national party, California Republicans find themselves in the role of a minority opposition party that's long on obstruction but so far short on alternative ideas. The CA GOP has tough decisions to make: should defecting Republican legislators who voted for the budget to be punished, and who will the party hierarchy support in the burgeoning 2010 gubernatorial primary? It promises to be an awkward family reunion that's worth watching.	Tom McClintock, Anthony Adams, Carla Marinucci	00:27

02/26/09	POLI	Even with the significant cuts in spending, the new revenue sources from tax increases on the richest Americans and a carbon cap-and-trade system, the projected national deficit in President Obama's new federal budget will be \$712 billion in 2019; the national debt will almost double to \$23.1 trillion. The President will probably simultaneously anger and please almost every kind of constituent with his budget proposals, but the bleak reality is that the country is so deep in debt, there isn't much he can do long-term. Does the huge national debt figure ultimately matter?	Diane Lim Rogers	00:15
02/26/09	POLI	Among the many ambitious programs contained in President Obama's budget is one particularly provocative idea that, if it works, could radically change the country's economic and environmental landscape. The President proposes to auction off carbon permits to businesses, which should bring in some \$80 billion a year between 2012 and 2019. Of that money \$15 billion would go toward "clean" energy investment and the rest would pay for individual tax credits. Is it possible to ostensibly reduce greenhouse gas emissions while also generating a new revenue source for the government?	Robert Stavins	00:11
02/26/09	POLI	In order for President Obama's budget projections to pan out over the next ten years he'll need a lot of peace and prosperity in the world. On the peace side of things the President is hoping for major changes in the Iraq and Afghanistan wars, and is banking on no new expensive military expeditions during his time in office. The gimmickry of the Bush Administration, which kept supplemental funding requests for Iraq and Afghanistan separate from the Pentagon budget, is over; and while the Pentagon's budget grows in the next two years, it then starts to dramatically shrink. Is the President being a little too hopeful on a peace-loving world?	Tom Bowman	00:09

Now that President Obama is in the White House, and his mortgage relief plan relies on cram-downs, there is new pressure for Congress to act and the first vote on cram-down legislation in the House is expected Thursday. 03/04/09	ENV	It was hoped that last year was an anomaly—the number of wild salmon returning to the Sacramento River Delta for spawning last year was so low that federal regulators banned ocean fishing of salmon in California and most of Oregon. This year's salmon count reveals that last year's depressingly low numbers might be the new norm: California's Chinook are so low in numbers that a second straight year of a salmon fishing ban looks likely, resulting in a combined environmental and economic disaster for the state. Are we forced to adapt to the decimation of our local wild salmon population, or can something be done to reverse the damage?	Neil Manji	00:10

Thus it's not surprising that the American recession is quickly spreading around the world, led by the failures of multinational banks heavily invested in the U.S. market. However the sheer numbers of financial loss are staggering: one estimate says that global financial assets lost an equivalent to one year of world gross domestic product in 2008; the World Bank says the global economy shrank for the first time since World War II. He said that homosexuality is a trait you're born with, just like race. And although he said Roe v. Wade was wrong, he also stated that abortion is an individual choice. So is Steele trying to moderate or redefine the Republican platform? Or is he just not picking his words as carefully as perhaps he should?	John Feehery, Ben Smith	00:15
03/13/09	ECON	You think you've been hit hard by the global economic downturn? How'd you like to lose \$18 billion? That's how much money Bill Gates lost. Poor Warren Buffet lost \$25 billion. Okay, okay, you're probably not feeling too much sympathy, especially since they remain the two richest people in the world. Who else is now listed on Forbes 793 billionaires list? Lots of capitalists, tycoons and even a top drug dealer...together, they've lost \$2 trillion from a year ago, down to a meager \$2.4 trillion. Woe these victims of the global recession. 03/17/09	ECON	President Obama's budget includes a proposal to reduce the tax break for households earning more than \$250,000. Under the plan, those paying 33% and 35% interest rates could claim deductions only at a 28% rate. This would impact the top 2% of households nationwide, but California contains a disproportionate one-sixth of those households affected. Some critics argue that reducing the tax break would cause high-income homebuyers to spend less on their homes and ultimately drive down all home values. 03/27/09	POLI	State officials announced today that higher taxes and more cuts are unavoidable. Because California won't receive enough federal budget relief, Californians will have to sustain nearly a billion dollars in welfare cuts and \$1.8 billion in higher taxes. The state is only receiving \$8.17 in federal relief—and it needed \$10 billion in relief to avoid these cuts. So how much more will you be paying? And is this the final word or is there any hope to avoid this?	HD Palmer, Karen Bass, Roger Niello	
03/27/09	ART	Family, friends, and fans of actor Stacy Keach can rest easy. After being hospitalized for suffering a stroke 10 days ago, the star of the play "Froxt/Nixon" is feeling well enough to return to the stage. Keach, who plays the role of Richard Nixon, said he had felt a stinging sensation in his right arm several times during his rigorous schedule of 8 shows a week. When he finally went to the doctor to see what was wrong, the doctor told him he'd had a series of minor strokes. A wake-up call, Keach has said he's going to quit cigarettes, watch his diet and exercise. He's also easing back into his "Frost/Nixon" schedule, starting with tonight's performance.	Stacy Keach

03/27/09	FOR	After almost eight years of military operations in Afghanistan it could be argued that the United States has actually lost ground in its goal to defeat the Taliban, al Qaeda and construct a stable Afghan government. Acknowledging this fact, President Obama today announced a change in strategy that will implement an Iraq-like surge in Afghanistan with 21,000 new American troops and at least 1,000 civilian aid workers and advisers heading to the war zone. There's also \$1.5 billion in economic aid going to Afghanistan and new demands on that country's increasingly unstable next-door-neighbor, Pakistan. With a growing insurgency and disenchantment with the presence of American troops, will the Obama plan strike the right chord?	M. Ashraf Haidari	
03/27/09	LIT	Remember in "Jurassic Park" when those short-sighted scientists extracted prehistoric DNA from amber to grow real dinosaurs? Well now it's really happening—scientists hope to hatch a real dinosaur, and without DNA. But being a recession and all, they figure they'll start out modest...with a chickensaurus. Really. Jack Horner, world renowned paleontologist and adviser to Steven Spielberg, and James Gorman, deputy science editor of the New York Times, are here with their new book, How to Build a Dinosaur. 03/30/09	ECON	The numbers are staggering. The National Debt has increased an average of \$3.73 billion per day since September 28, 2007. It is now at \$11 trillion. The Bush administration added \$4 trillion. The National Debt stood at \$10.6 trillion on the day Barack Obama took office. But if his budget projections are accurate, he'll run up nearly as much government debt in four years as President Bush did in eight. Clearly, something has to be done to try and resuscitate our ailing economy. We can't let the financial system collapse. And the US can't simply walk away from two wars, so those bills continue to pour in. But how much longer can this go on without serious repercussions? And is it moral to saddle future generations with so much debt?	Josh Gordon, John Irons, Ted Dehaven	40:00

03/31/09	POLI	<p>What a way to set up an international summit: Last week the Czech Prime Minister, who also currently occupies the 6-month rotating presidency of the European Union, characterized President Obama's plan to spend the U.S. out of a recession as "a road to hell." Now the President rides that road to hell straight to the G-20 summit in London this week, where he will meet with skeptical European and Asian leaders who will not only be quick to blame the U.S. for the global recession but hesitant to sign onto U.S.-led solutions to the crisis. The President will need his patented Obama-charm to win over some doubtful leaders—but even if he fails, how badly does the U.S. need international cooperation to solve its own economic problems?</p>	Luigi Zingales	00:15
03/31/09	ECON	<p>A big part of the debate that will play out this week at the G-20 is how to craft a new regime of financial trading regulations that will stave off the next global economic crisis. But the skepticism about American re-regulation and economic stimulus expressed by some European leaders is based on doubt about the policy makers themselves. A revolving door of Wall Street executives and government official—think Greenspan, Rubin, Paulson, among others—has some worrying that politicians in Congress and at the Treasury Dept. are perhaps too friendly toward the markets. Is lasting, meaningful regulation reform possible with the current cast of characters in Washington D.C.?</p>	Simon Johnson	00:20
