4/1/09	ENV	New climate action team report doesn't look so good for state	Peterson	:44
4/1/09	LAW	Crime is down in Los Angeles and other parts of the Southern California, despite expectations that it would rise due to the recession and a 12% unemployment rate in Los Angeles. In the city of Los Angeles, property crime is down 6.4% and violent crime is down 4.9% compared to the same period last year. Larry Mantle and guests talk about this surprising trend.	Frank Stoltze, George K	20:00
4/1/09	ECON	Unfortunately, this is no joke. To help offset the state's \$41.6 billion budget deficit, California residents today will begin to face an increase in their sales tax that will bring their rate to almost 9 percent. Experts say that the increase on items like cars, furniture, laptops and toys will bring in \$5.8 billion until it expires in July of 2011.	Nancy Sidhu	10:00

4/1/09	POLI	Since 1959, when Fidel Castro took power in Havana, the US has maintained a trade and travel embargo against Cuba. But that may finally be changing. The Obama Administration, along with a group of lawmakers, wants to start chipping away at the restrictions. The Administration supports lifting bans on travel and allowing Cuban-Americans to send remittances to their families. Is this the beginning of a rapprochement with Cuba? Larry gets the details.	Tom Gjelten	30:00
4/1/09	POLI	President Barack Obama and first lady Michelle Obama arrived in London Tuesday, the first stop on their eight-day, five-country trip through Europe. In that brief period of time, the President will attend the G-20 economic summit, a NATO summit, deliver a speech in France on the trans-Atlantic relationship, and give an address in Prague on weapons proliferation. He will also make his first stop in a Muslim nation, Turkey. How will Mr. Obama be received in these countries by their leaders and citizens? And what do Europeans think of his performance as President so far? Larry Mantle talks with reporters abroad.	Andrew Hilton, Owen M	40:00
4/1/09	LIT	Spade and Archer' is a gritty mystery novel that focuses on the Private Detective Sam Spade. A prequel to Dashiell Hammett's "The Maltese Falcon," the novel follows Spade as he sets up his own agency in San Francisco in 1921. Spade brings on his partner in crime Archer. From booze runners to murderers the book follows Spade through his early years. Larry Mantle talks to author Joe Gores about the noir behind his novel.	Joe Gores	20:00
4/1/09	ENT	SAG and AFTRA announced they have reached a tentative new contract for commercials which includes more than a \$36 million increase in wage rates and other payments, about \$21 million in increased contributions to pension and health plans and calls for a payment structure for work made for the Internet and other new-media platforms. The agreement, which still must be approved by the joint SAG/AFTRA National Board and then ratified by membership, was reached in difficult negotiations, but marked a sea-change in the formerly contentious relationship between the two actors' unions as they worked closely to hammer out this deal with the advertisers	Alex Ben Block	00:09
4/1/09	FOR	Indian businessman Nandan Nilekani once commented to Thomas Friedman, "Tom, the playing field is being leveled"—a remark that inspired Friedman to write The World is Flat, a big-think book about off shoring and globalization that sold millions. Now Nilekani has a book of his own, Imagining India, a definitive look at modern India, challenging traditional wisdom and exploring what is at stake in the world's largest democracy. Why is India's huge population also its greatest strength? How is information technology bringing the benefits of globalization? And the question on all our minds: in the showdown between the two emerging world powers—India and China—which country will come out on top?	Nandan Nilekani	00:29
4/1/09	IMM	It's been one of the most contentious parts of the federal government's recent immigration policy: worksite raids targeting illegal immigrant employees, often resulting in dozens of detentions and enmity in the targeted immigrant communities. A byproduct of the Bush Administration's failure to secure broad immigration reform, the raids were deemed both inhumane by immigrant activists and necessary law enforcement by opponents of illegal immigration. Now the Department of Homeland Security is about to announce a change in policy that will shift the focus of these raids from the employees to the employers that hire illegal immigrants. Will the changes placate both sides of the debate?	Xavier Becerra, Mark Kr	00:35
4/1/09	SCI	No, it's not an April Fools' prank: after more than a decade of work and \$3.5 billion, engineers have completed the world's most powerful laser, capable of simulating the energy force of a hydrogen bomb and even the sun. We check in with an expert for the details.	Edward Moses	00:18

4/2/09	FOR	Leaders from the G-20 summit announced today that they would put \$1 trillion into the global economy and seek greater regulation of the financial industry. The announcement is a compromise between nations that called for more spending and nations that sought greater financial reform to deal with the worldwide recession. Larry Mantle discusses the details and how the G-20 leaders will implement their plan.	Alistair Milne, John Auth	40:00
4/2/09	OC	Larry Mantle talks with Gustavo Arellano, OC Weekly staff writer and Orange County Register senior editorial writer and columnist, Steven Greenhut, about the latest news events and developments in Orange County.	Gustavo Arellano, Steve Greenhut	30:00
4/2/09	LIT	It's not brain surgery, oh wait a minute, it is....In his new book Brain Surgeon, Dr. Keith Black talks about his work in brain surgery. Making complicated medical practices accessible, he illustrates the inner workings of the brain. Dr. Black is Chairman of the Department of Neurosurgery and Director of the Maxine Dunitz Neurosurgical Institute at Cedars-Sinai Medical Center. Larry talks to Dr. Keith Black about his experience and his profession.	Keith Black, M.D	30:00
4/2/09	POLI	The world's financial powers came to some agreement at the G20 summit today when they pledged more than \$1 trillion for emergency loans from the International Monetary Fund and World Bank to combat spreading chaos. They continued to grumble, however, over President Obama's proposal for new stimulus spending. We check in for the details.	Harry Broadman	00:15
4/2/09	FOR	The world may be fixed on the G-20 summit this week, but in the wings waits the next potential global spectacle—North Korea's plans to launch what it considers a benign rocket carrying a communications satellite, but what Washington considers an intercontinental ballistic missile, or IBM. President Obama and South Korean President Lee Myunk-bak agreed at the G-20 this week on "a stern, united response," but with two American journalists detained in North Korean capital Pyongyang, what's the best course of action?	Jane Harman, Gordon G. Chang	00:20
4/2/09	LAW	The nation's largest prison system could get even larger if a proposal to expand three prisons to hold an additional 2800 inmates is approved by the legislature. Corrections Secretary is asking for the money to be drawn from \$7.8 in bonds approved in 2007, and hopes this construction will alleviate some of the over-crowding causing unconstitutional conditions for physically and mentally ill inmates and eliminate the need to release any prisoners early. Critics say this is the wrong approach and adding more beds will only mean more prisoners will be added to the system. The question is difficult and opinions are many; what do you think?	Seth Unger, Don Spector, Mark Leno	00:18

4/2/09	ECON	College applicants are feeling the downturn in the economy this week as they begin receiving admission decisions from universities. The recession may be making it easier to gain admission to some private schools as fewer applicants can afford to apply, but that means private schools are covering their end by sending out more letters of acceptance and creating bigger waiting lists, while public and lower-cost universities are being overwhelmed by applicants. We take a look at how this year's economy is affecting college admissions in predictable and not so predictable ways.	Katharine Harrington, Mae Brown, Rick Shaw	00:35
4/2/09	LIT	Your worst breakup probably doesn't compare to being dumped by your bride a few days before the wedding. That's what happened to Franz Wisner. He managed to make the best of the situation by taking his brother Kurt with him on the honeymoon and turning their travels into a New York Times bestseller. Not bad for the victim of a runaway bride, but what happens after the honeymoon? The brothers face the reality of being thirty-something bachelors in LA, and start to wonder what romantic options are open to jilted grooms (and their brothers). So, they set off to travel the world to find out how countries around the world view love and maybe, just maybe, turn one man's journey from jaded, jilted groom, to simply a groom.	Franz Wisner, Kurt Wisner	00:18

4/3/09	POLI	In a move that would grant mean more government control over the tobacco industry, the House Thursday voted 298 to 112 to give the Food and Drug Administration greater power to regulate harmful chemicals in tobacco products. A bill like this has been in the works since 2000, when the Supreme Court ruled that the FDA did not have the authority to regulate tobacco products. Those who oppose the bill say that an FDA stamp of approval would imply that cigarettes are safe. Experts believe the Senate vote will be much closer.	Stanton Glantz, Danny M	30:00

4/3/09	LIT	Wikipedia and its editors help the public to learn a little bit more about the topics that interest their readers. But we know very little about what's behind Wikipedia itself. In The Wikipedia Revolution, author Andrew Lih discusses how the online encyclopedia came into being, who exactly keeps the incredible site on track and how its editors reflect the cultures and lifestyles of their countries. He also tells readers about the personality of founder Jimmy Wales and how Wikipedia has become a powerful teaching tool. Lih talks to Larry about his new book about the company that helps to give every person free access to the vast expanse of human knowledge.	Andrew Lih	30:00

4/3/09	TRAN	In the wake of a double-fatal crash in La Canada Flintridge and in response to calls by city officials for safety improvements, Caltrans announced today that it would ban trucks from Angeles Crest Highway for 90 days until a permanent ban can be put in place. We get the latest.	Doug Failing, Greg Brown, Anthony Portantino	00:19
4/3/09	SCI	Ladies, what if your man's biological clock was ticking just as fast as yours? Indeed, studies have shown that children born to older fathers are more likely to score lower on tests of intelligence and run a higher risk of bipolar disorder. What would happen if, as writer Lisa Belkin says, "all those silver-haired sex symbols, balding sugar daddies and average-Joe divorced guys who are on their second families because they can be while their exes are raising their first set of kids—what if all of them became, in women's eyes, too darned old?" We discuss the age and fertility question—this time, focusing on men.	Lisa Belkin, Dr. Harry Fisher	00:28
4/3/09	ECON	When you were a kid your grandmother gave you U.S. Treasury bonds each year for your birthday, and you usually rolled your eyes—much rather have the shiny new toy! When you grow up, the shiny toy becomes hot stock in IBM, Google or Chevron, but the bonds remain the same: old and boring. Turns out that your grandmother was right about the safe, boring place to invest your money: a new study by an investment guru shows that over the past 40 years, investors who bought and rolled 20-year Treasury bonds would have done slightly better than those who just bought and held stocks. Is the conventional wisdom about the rewards of long-term investment in the stock market flat out wrong?	Robert Arnott	00:35

4/6/09	POLI	North Korea took another step in advancing its space program – or its ballistic missile program, depending who you ask – over the weekend with the firing of a three-stage rocket. Although the launch was only a partial success (reports are that the third stage failed) the United States and other western powers are trying to forge a strong response via the United Nations. So far, however, Russia and China are balking at a Security Council condemnation. Where does this leave the balance of power in North Asia?	Jim Walsh, Gordon G. Chang,	20:00
4/6/09	POLI	An Iowa Supreme Court ruling has legalized gay marriage in that state. 4/6/09	ECON	More accurately, your stimulus dollars are starting to be sunk into roads, and highways, bridges, schools and several different infrastructure projects as stimulus-funded construction begins in earnest. Early reviews show that a new bridge over a Louisiana bayou, the widening of a mountain road in Colorado and sidewalk repairs in Portland, OR are underway thanks to stimulus money. Here in California infrastructure projects are gearing up, but the bulk of the money will be used to bolster the state's aging healthcare system. With so many billions of dollars being thrown around the potential for fraud and waste are high—as the stimulus gets off the ground, so does its oversight and we bring you the early reports	Cynthia Bryant, Laura Chick, Dennis Cauchon	00:35

4/6/09	LAW	Despite Sen. Dianne Feinstein's efforts and a slew of recent assault weapon massacres—a man who shot to death three police officers in Pittsburgh, a Seattle father who fatally shot his five children and himself over the weekend, and the March 21st slaying of two of the four Oakland police officers—it looks unlikely that her 1994 assault weapons ban will pass through Congress. Even democrats like House Speaker Nancy Pelosi and Senate Majority leader Harry Reid (D-NV) oppose efforts to bring back the ban. We hear from both sides	Dianne Feinstein, Gary	00:18
4/6/09	POLI	Two weeks ago Attorney General Eric Holder caused a major splash in the proverbial bong-water when he said that raids on California's medical marijuana clubs were no longer a priority for the Justice Department. One week later, the Drug Enforcement Administration raided a medical pot club in San Francisco, causing all kinds of confusion and conspiracy theories about who, exactly, was setting and enacting drug enforcement policy in the Obama Administration. So what are the Justice Department and DEA positions toward our medical marijuana law? We seek clarification directly from the DEA and get into the broader questions of legalizing pot	Garrison Courtney, Jim Gray	00:35
4/6/09	POLI	Mayor Villaraigosa said at his City Hall news conference this morning that he wants city workers to begin paying more toward their retirement benefits and to consider cutting back their work week by one hour—measures he says could save up to 1,300 jobs. The city is facing a projected budget gap of \$530 million and even after deep cuts, could be forced to cut as many as 2,800 jobs. Could hourly furloughing really fix that? 4/10/09	ART	In 1955, Canadian pianist Glenn Gould made a name for himself by playing a variation of Bachs "Goldberg Variations". Then, in 1964, Gould made music history again—not by playing this time, but by stopping to play. Gould preferred the idea of manipulating music—indeed the foundation for his famous "variations" of Bach's "Goldberg Variations"—and he foresaw a time where listeners would also be able to use technology to manipulate recorded music in many ways. Indeed, what he called "dial-twiddling," we now know as remixing. We revisit the 45th anniversary of this revolutionary pianist's last public performance and how he became a pianist-turned-prophet. 4/13/09	SCI	For the past three years animal rights activists have used violent attacks and threats to target University of California scientists who use animals for their research. Last month, UCLA neuroscientist J. David Jentsh found his car set ablaze outside his home. Jentsh is responding by standing up to the threats, having founded an organization at UCLA to voice support for ethical animal research and planning a pro-research campus rally later this month. Larry Mantle gets the details from both sides of the issue.	David Jentsch, Jerry Vla	30:00

4/13/09	ENV	President Obama's stimulus plan included about \$3.5 billion for carbon capture and storage (CCS), or sequestration—the practice of compressing carbon dioxide gas to a liquid state and pumping it deep under ground. The idea is that sequestering carbon dioxide emissions from coal power plants and factories can hinder damage to the environment. But some environmentalist groups say it's a waste of time and money and could even contaminate potable water. Are there legitimate health risks to carbon sequestration and is it a necessary part of a solution to global warming?	Julio Friedmann, Jane Williams	00:18

The good news is there are all sorts of stimulus-related tax breaks out there, including an \$8,000 First Time Home Buyer's Credit that applies to homes bought this year. There's also a credit for car buying. And there's a \$2,400 tax exemption on unemployment compensation; unfortunately, there are too many people nowadays who qualify for that one. The economy may be tanking, but maybe you can make up for some of the loss on your taxes. Find out how	Robert Goldstein	00:23
4/14/09	ECON	The 2008 tax year is expected to produce a record number of first-time delinquent tax filings, as Americans hammered by falling home prices, unemployment and sinking assets avoid the merciless tax collectors. 4/17/09	HIST	As the tenth anniversary of the Columbine massacre nears, we continue our two-part series look at its legacy. Many misconceptions and questions remain—if Eric Harris and Dylan Klebold were not loners or outcasts, what caused them to carry out the largest school shooting of their time? And how did their rampage forever alter campus life in this country? Two renowned experts join Patt to speak about the profile of a killer and how Columbine changed how America goes to high school. 4/17/09	EDU	When President Obama gave an address last month on proposed reforms for the national education system, one idea sparked a renewed round of debate: the notion of merit pay, or financially rewarding teachers for classroom successes, is not new but has been gaining some traction. While the President presented the idea as still experimental, merit pay programs are already in full effect in several school districts across the country. In two cities where public schools have less than stellar reputations, performance pay seems to be paying dividends: Chicago and New Orleans both report good results from their merit pay programs. Will teacher merit pay be moving to the front of the classroom?	Kevin Gutterrez, Veronica Griffin, AJ Duffy	00:35
4/17/09	ENT	Hollywood crews have lived a nervous existence since last year when the Screen Actors Guild held a strike authorization vote. But today SAG and the Alliance of Motion Picture and Television Producers have reached a tentative contract. Details of the agreement covering television and motion picture actors will not be disclosed until it reviewed by the SAG national Board of Directors over the weekend, but word has it the contract isn't terribly different from what was offered by the producers some months ago. 4/23/09	ECON	Today President Obama will meet with credit card executives to discuss changing their practices to help protect consumers. Both the House and Senate are considering a credit cardholders' "bill of rights" that would limit the ability of companies to raise interest rates on existing balances and require greater disclosure. Critics in the banking industry say that such a move would hurt the nation's push for economic recovery by restricting lenders and making credit less available. David Lazarus examines the issues on the table.	Michael Crittenden, Steve Bartlett	20:00

"It's going to be huge," he said recently, "we're ready to go." But are the residents of Industry and the surrounding cities as psyched? Walnut has a pending lawsuit over the proposal and experts have questioned Semcken's rosy estimates of job creation and overall economic impact to the region. What do you say? Is this the future of football in LA? It's your turn to weigh in.	John Semcken, Collin Cowherd	00:27
4/23/09	POLI	California Attorney General Jerry Brown sued three subsidiaries of Wells Fargo today, seeking \$1.5 billion in damages. He claims the company misled investors on the safety of auction-rate securities, commonly called ARSs. Brown says Wells Fargo is responsible for being deceptive, but Wells Fargo CEO Charles W. Dagg says his company could not have foreseen the prolonged liquidity crisis and is not responsible for any losses. Who's at fault here?		00:15

4/23/09	SCI	Called the "poet laureate of medicine" by The New York Times, Dr. Oliver Sacks has transformed our understanding of the human mind through his writings about the far boundaries of neurological experience. In his latest book, Musicophilia: Tales of Music and the Brain, he tells the stories of neurologically damaged people who have lost their memory, and sometimes their ability to speak, but are still able to remember and produce music. Sacks tells the story of the surgeon struck by lightning and suddenly obsessed with classical music, and the man whose memory scans only seven seconds—except when playing music. He shows us how our worlds are poised precariously on a little biochemistry, and that music may be our best medicine.	Dr. Oliver Sacks	00:31

4/30/09	ECON	President Obama has announced that Chrysler will file for Chapter 11 bankruptcy. The announcement was made after talks with a small group of creditors crumbled just a day before a government deadline for Chrysler to come up with a restructuring plan. The Chapter 11 filing would allow a judge to decide how much the company's creditors would get. When it files for bankruptcy, Chrysler would continue operating and Fiat would still sign on as a partner on Thursday. Fiat has agreed to manufacture a new small car in one of Chrysler's U.S. facilities and to share key technology with Chrysler. The government already has promised to back Chrysler's warranties in an effort to allay customers' fears that the automaker wouldn't be around to honor them.	Dan Neil	20:00

5/5/09	HOUS	Depending who you ask, the housing "crisis" is either nearing bottom, or on the edge of a second precipice. The right answer depends on which housing crisis you're talking about. In traditionally high-end, desirable areas there are now bidding wars going on for homes. While in outlying areas, take Victorville, things are so bad that banks are now ripping down uncompleted houses and selling the building materials for scrap. But with so much of the economy riding on the housing market, which market counts? Larry takes a look at the housing crisis and tries to figure out if things are leveling off. 5/5/09	SAC	The centerpiece measure on the May 19 <sup>TH</sup> special election ballot is Proposition 1A. It would establish a state spending cap and strengthen the state's rainy day fund which sets aside money for hard times. Less promoted is the flip side of Proposition 1A: If approved, temporary increases in the sales tax, personal income tax and the vehicle license fee will be extended an additional one to years, in some cases through 2013. Governor Schwarzenegger supports the measure along with State Democrats and some key Republican lawmakers. 5/5/09	ECON	Along with used car salesmen and politicians, credit card companies are high up on the list of the universally hated and for good reason: unjustified hikes in interest rates, hidden fees and predatory marketing have ensnared millions of Americans in substantial credit card debt to the tune of \$2.7 trillion in 2008. An effort is underway in Congress, backed by President Obama, to enact a new credit cardholders' "bill of rights" that promises to scale back some of the credit card companies' most unsavory behavior. Is the new bill of rights, which has already passed the House, real reform or merely a list of feel good but ultimately toothless provisions? Can we change our own bad habits with credit cards? In doing so, Obama is putting immigration enforcement as a high priority, beefing up security around the border, air- and seaports, as well as intensifying screening for employee eligibility. 5/6/09	ENER	The EPA reports that ethanol, as produced today, does not meet congressional mandates that it produce 20 percent less greenhouse gas emissions than gasoline. In fact, it reports that when land-use from ethanol production is taken into account, it may actually be worse. EPA Administrator Lisa Jackson said future improvements in production will, ultimately, make ethanol the better choice. But not everyone agrees. Nitrous oxide from the burning of bio-fuels may turn out to be an even more potent contributor to global warming. Meanwhile, the Obama Administration issued a directive to find ways to get automakers to make more cars that can run on ethanol. What's the truth? Is ethanol part of the solution or part of the problem in fighting global warming?	Tim Searchinger, Mark Stowers	30:00

5/6/09	DIS	It could be classified as either a grim contingency plan for the likely failure of Propositions 1A - 1E or a shot across the bow of California voters. Earlier this week Gov. Schwarzenegger briefed state firefighter unions and Cal Fire that he was prepared to cut 1,700 firefighters (600 full-time positions and 1,100 seasonal firefighters) from Cal Fire's firefighting staff, saving \$80.8 million. As the first wildfire of the season rages in Santa Barbara it would seem like poor timing to start considering cuts to the state's firefighting capabilities, but these are desperate times for California's budget. 5/6/09	ECON	To say that the American economy, led by the nation's banks, is stressed out is an extreme statement of the obvious—the differing levels of stress could go a long way to figuring out how to best solve the credit crunch. On Thursday the Federal Reserve plans to deliver the results of stress tests on U.S. banks that may show that 10 or more companies need additional capital to weather a deep recession. The stress tests have been equally criticized and lauded as a way to shed light on true health of banks. 5/6/09	MIL	Today Secretary of State Hillary Rodham Clinton said the U.S. "deeply, deeply" regretted the loss of innocent life in fighting between the Taliban and Afghan forces in the western Farah province, a battle in which the American military lent air support to the Afghan fighters. At the same time, the U.S. military has started an investigation into the deaths, saying there is information that American bombing was not the cause for the civilian casualties. According to a reporter covering the story in Kabul, the facts there are unclear and the situation is fluid. And here in the U.S., the aftermath and potential political and diplomatic fallout of these events is impacting talks between the Obama administration and the leaders of Afghanistan and Pakistan. 5/8/09	ECON	On Tuesday, Governor Schwarzenegger opened the door to debate over legalizing marijuana in California as a way to increase revenue in the state. A Field Poll released last week found for the first time that a majority of California voters supported legalizing and taxing marijuana. But exactly how much money would be generated by such an idea? One economist estimates nationwide revenues of \$6.7 billion annually and savings of almost 13 billion in law enforcement expenses. We crunch the numbers for California.	Stephen Easton	00:22

5/8/09	LIT	In Greek mythology, Medea is the woman who murdered her own children in despair. In a new book, the Medea Hypothesis, biologist Peter Ward says we humans are about to be murdered ourselves, in a die-off that's a regular part of the cycle of life and death on this planet. This stands in stark contrast to James Lovelock's Gaia hypothesis--the idea that life sustains habitable conditions on Earth. Could life by its very nature threaten its own existence? Ward, an astrobiologist with NASA, using the latest discoveries from the geological record, argues yes. How worried should we be?	Peter Ward	00:22

5/11/09	MIL	As the rationale for the Iraq war was changed, spun or evolved (depending on your political perspective) one goal was consistently held up over the six years of U.S. presence in Iraq: the rebuilding of Iraq's government and infrastructure in order to sustain a democratic, peaceful and self-reliant country. Even as Iraqi reconstruction was a constant in American policy since 2003 so were the plagues of waste, fraud and misguidance during the American reconstruction effort. As American troops slowly begin to cycle out of Iraq for good, the inspector general who oversaw the U.S. reconstruction effort in Iraq is here to talk about what went right, what went wrong and how can apply these lessons to Afghanistan. The Medicare system is expected to be depleted by 2017 and social security by 2037. That means the government would need to borrow money or raise taxes to get the system back on track. The problem stems from the recession, as unemployment has cut the amount of contributions from payroll taxes. Larry Mantle finds out what lies ahead for the Medicare system. 5/14/09	POLI	Gov. Schwarzenegger presents two versions of his revised May budget in a 2:00 pm press conference today—one represents the standing budget if voters approve all the Governor's measures on the May 19th special election ballot, while the other represents a scenario in which all initiatives fail. The latter would include severe budget cuts. Critics are skeptical of the Governor's timing: with just five days before the election, is this a mere scare tactic? We check in for a preview of the presser.		00:09
5/14/09	POLI	We check in with Mayor Antonio Villaraigosa, who called a press conference earlier this morning to oppose the City Council Budget Committee's effort to freeze the mayor's police hiring, as well as to discuss his push earlier this week to get the City Council to declare a fiscal emergency of the \$530 million deficit Los Angeles is facing in the next fiscal year. 5/14/09		Desolate auto lots already seemed to be growing like weeds in California and this morning Chrysler announced that 789 of their 3,181 dealerships will be receiving letters telling them to shut it down. Chrysler believes that by streamlining their dealerships down to only their most profitable locations they will increase overall revenue for their floundering company. 32 California Chrysler dealers are on the chopping block and some dealers are saying heck no they won't go. How will the dealership closures affect the local economies or will it at all?	Brian Maas, Philip Lanzafame	00:15
5/14/09	ART	At a time when most businesses could use a bail out, there's one industry that's booming: despite incredible odds and a failing economy, we just can't stop playing the lottery. Last year, 124 million Americans played, pulling in hundreds of millions of dollars for the industry. What possesses us to pour hard-earned money into such a statistically poor investment and could our vice even help us solve problems like our state's gaping budget gap? We take a look at the history of this American institution- from its roots in Jamestown, to the modern, multi-billion dollar business.	Matt Sweeney	00:08
5/14/09		Prop 1C would repeal current requirements that lottery revenue be used only for education, and authorize unlimited borrowing against future lottery proceeds to avoid cutting state government spending. The 2009-10 budget already includes \$5 billion from this source, but opponents say the extra revenue encourages gambling and exploits the poor. Could the measure work to balance our \$42 billion state deficit as it has in Florida and Texas? We hear from both sides.	David Crane, James Bu	00:30

5/19/09	LIT	With a book titled Stepmonster, you might be tempted to picture a figure as cruel and evil as Cinderella's wicked Stepmother, who forced the poor girl to do all of the housework on her own, and then isolated her in a tower. But far from the wickedness of that character is a more complex painting of today's stepmother. In Stepmonster, author Wednesday Martin transcends societal stereotypes to illuminate readers about the challenges a stepmother faces, from stressful situations to never feeling "good enough" in her new role. Her book is one of understanding (as she herself is a stepmother) and appreciation for one of the more underappreciated but ever-so-important family roles.	Wednesday Martin	30:00
5/19/09	ENV	After seven years in the wilderness of the Bush Administration, California has not only won its long-running fight with the EPA to set its own tougher standards for automobile fuel efficiency but has become the model for a national standard. In a deal that seeks to appease California, a skeptical auto industry and environmentalists, the Obama Administration will announce more stringent fuel efficiency standards that is more-or-less a copy of California's mandate of a 30% reduction in the greenhouse gas emissions of all automobiles sold in the U.S. by 2016. The biggest shocker in the deal is the willing participation of auto manufacturers—will it work, or is it too good to be true?	David Cole, Robert Stavins, Mary Nichols	00:35

Now the company is using that same approach on its employees. Google has come up with an algorithm to help them crunch the numbers on who on their staff of 20,000 is most likely to quit. The company believes that the data will help them prevent more people from leaving a company that some believe to have reached its innovative plateau. On Monday the U.S. Supreme Court refused to hear the lawsuit brought to them by San Diego and San Bernardino Counties' in an attempt to challenge the legality of California's medical marijuana laws. In 2003 Riverside County began issuing ID cards to medical marijuana users and advocates in San Bernardino believe that if their county will follow suit it will save tax payers money that is being spent on the prosecution of medical marijuana patients. The County still argues that issuing ID cards would violate federal drug laws.	Steven Cuevas, David Wert	00:15

5/22/09	POLI	With the rejection of all but one ballot measure in Tuesday's special election, the conversation in Sacramento is now moving towards budget cuts. Sen. Ron Calderon, D-Montebello told the San Gabriel Valley Tribune that they state is looking " at 15-to-20-percent cuts across the board." Gov. Schwarzenegger proposed an addition \$5.8 billion in reductions. These reductions come on top of the \$15.4 billion short fall facing the state due to the recession. With Iowa, Maine and Vermont joining Connecticut and Massachusetts in legalizing gay marriages the case brought to the courts by plaintiffs that see the ruling as unconstitutional grows ever stronger. California voters have approved a ban on same-sex marriages twice in the last nine years but the decision of whether or not the amendment abridges the privileges or immunities of citizens of the United States, lies in the hands of the State's highest court. 5/22/09	LAW	It's not like the debate over torture and Guantanamo Bay is anything new—we've been having it for at least seven years. But the circumstances in Washington D.C. yesterday were surely unprecedented: a sitting president speaking broadly on his national security policy while a former vice president spoke just across town defending his administration's unpopular decisions. That was the setup for Obama vs. Cheney, and both Republicans and Democrats run big risks and potential rewards in pursuing the politics of torture. Should the GOP hitch its wagons to the unapologetic Cheney and should Democrats be wary of the "soft on terrorism" charge?	Jim Pinkerton, Ed Kilgore, Craig Gordon	00:31

5/25/09	MIL	When should a country, like the United States, go to war? It is a difficult question and one that shouldn't be taken lightly. In his book "War of Necessity, War of Choice", Richard N. Haass looks at the first and second wars in Iraq with that question in mind. A member of the National Security Council during the first President Bush and director of policy planning in the State Department for George W. Bush, Haass has a perspective that only a handful of people have about the decisions made in going to war. Larry talks to Richard N. Haass about the ambition, execution and reasons by both wars and what the future holds for the current war in Iraq.	Richard N. Haass	30:00
5/25/09	POLI	The peace process between Israel and the Palestinians is stalled, so AirTalk goes "on the road" to convene a mock "peace summit" at the Japanese American National Museum in downtown Los Angeles. Bringing together a sitting Israeli diplomat with a Palestinian who actively lobbies the U.S. government on behalf of a two-state solution, Larry Mantle moderates the "negotiations" between the Honorable Jacob Dayan, Consul General of Israel to the Southwest U.S., and Hussein Ibish, Senior Fellow at the Washington, D.C.-based American Task Force on Palestine. 5/25/09	HEAL	Research on the amazing healing properties of stem cells, from their ability to regenerate tissue to their potential for correcting genetic defects, has been going on for decades with the long-held promise of revolutionary therapies for the masses. The game-changing stem cell therapies aren't quite ready for the commercial market yet but they're closer than they've ever been and the promise of a medical revolution is real. Patt talks with two of the leading researchers and shapers of stem cell policies about the first therapies that will hit the market and the ethical questions that come with employing stem cells on a massive scale. 5/25/09	LIT	Organized crime, black-market smuggling, environmental disasters – these aren't things you would normally associate with tiny, delicate butterflies. But award-winning journalist Peter Laufer exposes the dark side of the butterfly business and proves that it is a dangerous world. Laufer's research on the subculture of butterflies took him around the world from butterfly breeding businesses in Nicaragua across borders to Los Angeles and New York City. Along the way, he found out how far people are willing to go to smuggle unique, hard-to-find butterflies – and how much people are willing to pay for them. The subculture of butterflies includes criminals, collectors, conservationists, and more.	Peter Laufer	00:18

5/26/09	SAC	Five years ago Robin Tyler and Diane Olson became the first in the State to challenge the denial of a marriage license to a same gender couple as an unconstitutional ban on their right to marry. When the couple was denied the license in Beverly Hills, Gloria Allred filed a lawsuit and after a four year legal battle they won the right to marry in the California Supreme Court. Thousands of gay couples married as a result of that decision. When Prop 8 passed in November, banning same-sex marriage, Ms. Allred immediately filed the legal challenge on behalf of Ms. Tyler and Ms. Olson who had married, and on behalf of another same gender couple who wished to marry but could not because of the passage of Proposition 8. The Californian Supreme Court is scheduled to announce its decision on Prop.8 Tuesday at 10:00 am.	Julie Small, Brian Brown, Jon Davidson, Robin Tyler and Diane Olson, Karen England	60:00

5/27/09	SAC	The California Supreme Court Tuesday upheld the 2008's Proposition 8 to ban gay marriage. Although the decision has been made, the future fight for and against gay marriage seems to have just begun. Two lawyers have already filed a suit arguing that a California constitutional amendment eliminating the right of gay couples to marry violates the U.S. constitutional guarantees of equal protection and due process. The lawyers hope the lawsuit will immediately reinstate marriage rights to same-sex couples. Larry will talk about the steps that lie ahead for the opponents and supporters of gay marriage. 6/1/09	POLI	Recognizable to anyone who has ever traveled abroad, the value added tax is the exotic, onerous-seeming sales tax that accompanies almost every purchase throughout Europe and beyond. The VAT has never seriously been considered here, but that could soon change: eager to reform a ridiculously convoluted tax code, close a multi-trillion dollar budget deficit AND fund hugely expensive programs like single-payer healthcare, the Obama Administration is ready to give the VAT a new look. While a 10 — 20% VAT would spike the sales prices of almost every conceivable service or commodity, it could raise trillions in revenues—is the long-term payoff worth the pain at the cash register? 6/4/09	ART	"Louis & Keely: Live at the Sahara" started out, like so many great ideas, in a bar. The play's writers took their idea from the back room of a Hollywood lounge to the small and devoted Sacred Fools Theatre, where the play's future director and producer first saw it. That director is Oscar nominated Taylor Hackford, famous for his film directorial work The Devil's Advocate, Dolores Claiborne, La Bamba and An Officer and a Gentleman. The play marks Hackford's first time directing for the stage and he, like the play, is a success. Arnold Schwarzenegger and the legislature are about to cut down California's governmental services to historic lows, and in the process expose the most vulnerable Californians at the worst possible time. While the recession certainly boxed in the Governor, his failure to follow through on the promise to blow up boxes might have exacerbated the pain that California is now experiencing. 6/9/09	TRAN	The freeway is free, right? No--they're built and maintained through taxes. But there's a push on in the US to start charging people directly for using freeways. It's a big change, so the idea is to start with a pilot project. In LA County, the plan is to start letting solo-drivers pay to use stretches of the HOV lanes on the 10 and the 110. Sound fair? 6/9/09	HEAL	The sides are lining up in the fight over President Obama's goals for health care reform. Obama has said that he wants a health care plan that lowers costs, improves the quality of care and coverage, and protects consumer choice. He also wants to ensure that all Americans are insured, either through a private plan or a government-run plan. Critics argue that a government-sponsored program that competes with private health plans would hurt market-based competition and reduce individual choice. Larry Mantle gets the arguments from each side of the health care debate.	Alex Wayne, Matt Bai, Gerald F. Kominski, Uwe, Reinhardt	20:00
6/9/09	POLI	A cloud of doubt looms over President Obama's stimulus plan as unemployment numbers continue to rise and the economy is still stumbling. Obama's stimulus plan was hailed by many as the saving grace to a faltering economy. Yet, nearly 100 days after the plan was signed into law only 6-percent of the funds have been spent, according to the Los Angeles Times, and 150,000 jobs have been created. Critics say it is a negligible result in comparison to the loss of over 2 million jobs this year. Should American's adopt the President's wait and see attitude? Larry talks to the experts about what is being done, and if anything else can be done to stimulate the stimulus.	Heidi Shierholz, Curtis Dubay	20:00

Kurlansky captures the essence of that time and includes photos, anecdotes and his personal analysis of the food of America's roots. There is even a recipe of a Depression Cake, perhaps perfect for our time.		40:00
6/9/09	HEAL	16 years after Bill Clinton tried it, and after almost two years of hypothetical discussions of it on the campaign trail, we have finally reached the moment of truth: several different bills proposing various forms of radical reform of the American healthcare system are slowly making their way through Congress and President Obama has declared he wants to implement a new national healthcare plan by the Fall. As the system goes under the knife it promises to be a painful surgery—badly needed reforms will come at a price, perhaps mandated insurance or taxing employers' health benefits. What are the economics of healthcare reform and what are the positives & drawbacks to each plan?	Jonathon Gruber	00:12
6/9/09	HEAL	Part of what makes the effort to reform healthcare so unwieldy is the sheer size and scope of the problem, from millions of uninsured poor Americans to the middle class that can't keep up with escalating medical costs. Enter the AFL-CIO, the grandfather of organized labor that has a prominent place at the surgery table. Unions have been vilified for winning generations-worth of generous insurance benefits, the high costs of which might have been part of the failures of GM and Chrysler. What shape of reform works best for blue-collar, middle class workers?	Gerald M. Shea	00:12

6/11/09	SAC	Governor Schwarzenegger has threatened to allow the state government to shut down unless the California Legislature reaches a budget deal. He stated that he will not approve emergency borrowing to keep the California afloat unless state officials agree on a budget plan. State Controller John Chiang has said in order to borrow money, a budget deal must be reached by the start of the fiscal year in July. He expects the state to run out of cash by the end of that month. Larry Mantle finds out more about the governor's attempt to spur lawmakers into action.	Michael Rothfeld	20:00
6/11/09	RELI	Robert Wright, author and senior fellow at the New America Foundation, believes that there is a hidden pattern in the great monotheistic religions and a "hidden code" in their scriptures. In his new book The Evolution of God, Wright argues that the underlying message of the scriptures reveals the key to harmony and reconciliation among the Abrahamic faiths. He also shows how today these faiths can reconcile themselves with science and how the scientific worldview leaves room for something that can meaningfully be called the divine. Wright joins Larry Mantle to discuss how his research could alter our understanding of God and religious faith.	Robert Wright	40:00

6/24/09	HEAL	President Obama admitted yesterday in a White House press conference that he is still smoking cigarettes. Why can't Barack Obama, highly intelligent, self-disciplined, leader of the free world, kick the habit? David Lazarus and a medical expert talk with listeners about why some people just can't quit and how to reconcile the president's smoking habit with other aspects of his personality.	Dr. Joseph Haraszti	30:00
6/24/09	TRAN	In November, California voted in \$10 billion in bonds for a high speed rail network spanning from Sacramento to San Diego. Another \$8 billion is available for high speed rail from the Feds. And billions more are potentially available from the stimulus bill. That's enough dough to start the project. It's not, however, nearly enough to finish the project--let alone achieve the holy grail of a super-fast train between San Francisco and Los Angeles. That leg alone will cost some \$40 billion. So where do you start? When will it start construction? And when will some kind of service really come on line, if ever?	David Crane	20:00

6/30/09	ECON	The California legislature maybe handing out IOUS on Thursday, if they can not reach a balanced budget. After backing away from cutting funding from work-to-welfare programs and other statewide social welfare programs the legislature is still faced with the challenge of reducing the state's deficit. So, which programs will be getting an IOU? Larry talks to the experts about the remedies to the state's budget crisis.	Julie Small, Mike Herald, Howard Kahn	30:00
6/30/09	SPOR	Apparently looks matter... even in tennis. It seems this year good looks are showing up good shots at Wimbledon. Visitors to the All England Tennis Club are wondering what was going through the minds of schedulers when unknown players got Centre Court privileges while many others top seeded players like Serena Williams played their matches on outer courts. Larry asks experts to weigh in.	James Martin	30:00
6/30/09	FOR	American soldiers are scheduled to withdraw from Iraqi cities and towns today, turning over enforcement to local security forces. Prime Minister Nouri al-Maliki has declared June 30, "National Sovereignty Day" as Iraqis celebrate in the streets of Baghdad. Yet American and Iraqi officials worry that in the absence of U.S. troops, Iraq's cities will face a challenge from insurgents and al-Qaeda. What lies ahead for the Iraqi people? Larry and guests discusses the implications of the US troop withdrawal.	Rochdi Younsi	20:00
6/30/09	HEAL	Many people are speculating that Michael Jackson may have died from an overdose of prescription pain killers like Demerol and Oxycontin. But regardless of the outcome of his autopsy, Michael Jackson's untimely death is shining a bright light on the problem of prescription drug abuse. Why do people get so easily hooked on prescription pain medication, and to what degree are physicians enabling their addictions?	Dr. Joseph Haraszti	40:00

6/30/09	HEAL	Starting on Wednesday restaurant chains in California—those food retailers with 20 or more locations—will be required to provide a nutritional information and the calorie count for every item on their menus. California's Legislature is aiming to provide customers with more details of the food they're about to eat so they can make more informed choices. But will full disclosure prevent you from ordering those delicious chili cheese fries?	Lara Diaz Dunbar, Haro	00:27
4/109	HEAL	Pistachio growers are up in arms this week after the FDA, in an effort to prevent a repeat of the recent salmonella outbreak from peanuts, warned consumers not to eat pistachios after a San Joaquin Valley company's nuts tested positive for salmonella during routine checks earlier this week. The warning and recall have prompted supermarkets across the country to begin pulling a variety of pistachio-laden products from shelves. Is the FDA overreacting?	Ryan Jacobsen, Mike F	00:15
5.15.09	TECH	Twitter—it was all the rage, but history tells us it's only a matter of time before it's replaced with something new. The technology that marketed itself somewhere between a sms message and a blog seemed only to have a trickle of a following at first...and then it exploded. Are we over it yet or have we only begun to understand its potential? We consider the utter insignificance, or virtue, of the medium. What are you thinking?	David Pogue	00:28
5/709	SPOR	On the heels of a record 13 straight wins at Dodger Stadium Manny Ramirez will be suspended for 50 games for a positive test of performance-enhancing drugs. According to The Los Angeles Times Ramirez is expected to say the positive test results were a result of medication received from a doctor for a personal medical issue. If Ramirez's suspension is to hold, it will start on Thursday and be out of the Dodger line up until July 3 <sup>rd</sup> . Larry talks to Jon Weisman, author of 100 Things Dodger Fans Should Know & Do Before they Die about Ramirez and the potential affect to the rest of the season.	Jon Weisman,Bill Shaik	20:00
