Re: Solicitation No. W912P8-06-R-0089

We are pleased to offer our MWI Hydraflo pumps and drive units for the above referenced project and the opportunity to once again work with the USACE New Orleans District. Our proposal package includes the following for each pump station location:

- HAC360 Hydraflo pump rated 98,000 gpm @12.1' TDH. Pump is complete through the 90° elbow and terminates with a ANSI flange
- 108" X 108" X 1.5" thick base plates for pump support
- SS hardware and zinc anodes
- Each pump comes complete with a 735 HP skid mounted diesel drive unit, radiator and all required hydraulic components for automatic operation.
- 200 gallon day tank with transfer pump and motor
- Battery chargers
- Residential muffler
- Exhaust pipe with calcium silicate wrap to reduce heat
- Controls for the hydraulic system
- 2 sets of level controls per location to operate all pumps
- Hydraulic pipe with socket weld fittings and extra hydraulic oil to fill the pipes
- Hydraulic "jumper hoses" to connect to water pump and drive units
- Sand blast with epoxy paint for the water pump and elbow
- Full size water testing for each pump
- Start-up services and supervision of installation for 14 days.
- Two year warranty

We have endeavored to include all pertinent information to allow the USACE to make a complete assessment of our capabilities.

Quoted price is FOB factory, freight prepaid to job site, with contractor to unload. Payments terms to be negotiated. Delivery will be made on or before June 1st per the solicitation requirements.

We appreciate the opportunity to quote our equipment and look forward to your favorable consideration.

Yours Truly,

Marc A. Boudet
Vice President Sales and Administration
