Facebook	Alex Varos That makes sense. When all credit cards have pin numbers, like debit cards, many of these issues will be solved, but I guess the credit card companies don't want them solved. The technology is there, why not make all credit cards work with pin numbers.

Facebook	Philip Routh Almost forgot my other favorite podcast Answer Me This is from the UK and it's got a really simple premise, people email or phone in questions and the hosts answer them. It's always good for a laugh, and I typically end up learning something new. Each episode is an easy to digest ~30 mins. Did I mention they have done over 330 episodes? Lots of back-listening for those with time on their hands

I don't know what company produced it, probably in the early '70s called "Lie, Cheat &amp; Steal - a game of Politics." It was all about acting and psyching out your opponents. Really funny and challenging!</p>

EMAIL	<p>Hello, I am a loyal supporter of KPCC, but I am very disappointed in A. Martinez's decision to talk about speeding at over 100 mph on the freeway. I listen to your station with my children, and was horrified to hear an NPR host talk about this reckless disregard for others. I would really like for him to issue an apology. Thank you, Erica Rivinoja</p>
EMAIL	<p>I have been a listener and contributor to KPCC for many years so I was surprised and disappointed that in your new feature where you try to correct mistakes or lies from the candidates, you did not mention and correct the most egregious claim that many of the Republican candidates made in the debate. Most of them mentioned Planned Parenthood and claimed that it was selling body parts. That is an outright lie that they should have and probably did know was untrue but surely you should have known. I hope you will correct this omission in the near future. It is extremely important for the public to know the truth that the video to which they referred was heavily edited to distort the truth. Thank you, Patricia Colburn</p>
EMAIL	<p>Did I really hear someone this morning use the noun "effort" as a verb? "We are efforting to get" some information, etc. The woman who assaulted my ears with this sounded like a native English speaker, so that's not an excuse. Journalists are supposed to have a command of the language they use - please don't assault my ears again!</p>
