Hello KPCC , Can someone please slow down Mrs Tammy Trujillo? Or coach her to pronounce her news CLEARLY just like all your other excellent news readers and programers? She talks too fast, mashes words carelessly together and seems to be rushing somewhere, reading everything in a laid back casual-ness that fits parties and not news. As an fluent english speaker, I find that she is hard to understand. I can only imagine that people who are less fluent would have a hard time understanding her.

Gentlemen: For the last ten minutes I can hear some of the dialogue at the Republican convention, but then your commentators start talking right over the speakers, and it is impossible to hear either ones, the speakers or your commentators. I am a Bernie supporter, but your coverage makes no intelligent sense at all to hear one person speaking over another person at the same time so it all becomes just noise.
