**Re: Return to Operation with Main Antenna
Radio Station KPCC(FM), Pasadena, California
Facility Id. No. 51701**
Attention: Audio Division, Media Bureau

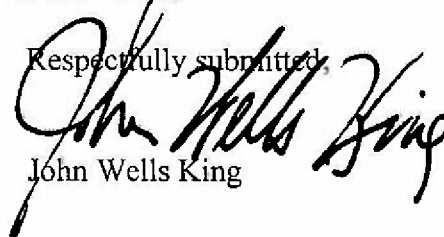

Dear Ms. Dortch:

On behalf of Pasadena Area Community College District ("PACCD"), licensee of noncommercial educational FM station KPCC, 89.3 MHz, Pasadena, California, this letter is written to notify the Commission that the station returned to normal operation with its main antenna on April 5, 2008.

KPCC had been broadcasting with an emergency antenna after damage to its main antenna caused by ice storms on Mt. Wilson, for which the licensee sought Special Temporary Authority on March 26, 2008.

Kindly communicate any questions directly to this office.

Respectfully submitted,

John Wells King
