**Re: Request for Special Temporary Authority
Radio Station KPCC(FM), Pasadena, California
Facility Id. No. 51701**
Attention: Audio Division, Media Bureau

Dear Ms. Dortch:

On behalf of Pasadena Area Community College District ("PACCD"), licensee of noncommercial educational FM station KPCC, 89.3 MHz, Pasadena, California, I hereby request special temporary authority, pursuant to Section 73.1680(b) of the Commission's Rules, to permit Station KPCC to operate with an emergency antenna located at a lower-than-authorized center of radiation.

KPCC broadcasts from a transmitter site located on Mt. Wilson. Ice storms in January damaged the antenna, which became inoperable on March 10, 2008. Since March 10, the station has operated with a whip antenna located approximately 80 feet above ground on an adjacent tower (ASRN 1007719) with the same coordinates as the authorized transmission site. At current operating values, the service area and interfering contours of KPCC do not exceed licensed values.

PACCD plans to replace the antenna and return to licensed operations hopefully in the first week of April 2008.

Respectfully submitted,

John Wells King
